

ARIZONA CNC EQUIPMENT
IMPROVE CNC
ACCURACY
LASER CALIBRATION SERVICES

Keep your CNC Machines performing at peak accuracy, productivity, and reliability.

Verify positioning accuracy

Improve repeatability and surface finish

Detect geometric errors early

Reduce scrap and costly rework

Maintain tight tolerances with confidence

Extend machine life and performance

ARE THESE ISSUES AFFECTING PRODUCTION?

- ✓ Difficulty holding tolerances
- ✓ Inconsistent part quality
- ✓ Frequent offset adjustments
- ✓ Increased scrap or rework
- ✓ Customer quality concerns
- ✓ Machines not performing like they used to

WHAT MACHINES DO WE CALIBRATE?

- Okuma
- HAAS Automation
- Doosan
- DMG MORI
- Matsuura
- Makino
- Mazak
- Fanuc Control
- Siemens Control
- Heidenhain Control
- Yaskawa Control
- Hexagon CMM
- Nikon CMM
- Many More!

ASK US ABOUT YOUR MACHINE!

ADVANCED RENISHAW CALIBRATION TECHNOLOGY

RENISHAW XM-60 MULTI-AXIS CALIBRATOR

- Measures positioning, straightness, pitch, yaw, and roll simultaneously
- Fast setup and comprehensive machine diagnostics
- Minimizes machine downtime

WHAT YOU RECEIVE

- Before & After Accuracy Reports
- Calibration Certificate
- Detailed Machine Performance Documentation
- Recommendations for Corrective Action
- Digital Traceable Measurement Data
